

PRODUCT DATA SHEET

USE OF IMAGE BOARD

IBOARD-image board is an innovative choice for various purposes at home, in office or commercial and public premises. IBOARD gives the room a special flavor either with printed images, patterns or logos on it. It is suitable for eg. kitchen splashbacks, kitchen islands, bathrooms, wall panels, floors, doors or ceilings.

HEALTH AND ENVIRONMENTAL RISKS

Product can be disposed as unsorted waste. See more information at www.seri-deco.fi and www.alcanairex.com.

PROPERTIES OF I BOARD

The I BOARD -image board consists of three components: 1. coating (monomer), 2. polymeric self-adhesive vinyl and 3. FOREXclassic -board.

You can see a special I BOARD watermark (3 cm x 0.6 cm) on every delivered product. It guarantees the high quality attached to the I BOARD brand. The I BOARD -image board designs are made in Finland under controlled conditions. Tiny, almost invisible particles under the monomer coating can be found on rare occasions.

SD OL 590	Avery MPI 2000	FOREXclassic -tile

self-extinguishing	self-extinguishing	B1 (DIN 4102, Teil 1, Germany)
		3 mm 1,95m ² /kg 5 mm 3,25m ² /kg

FIXING

The I BOARD -image board material itself is light and easy to install. High quality construction glues, silicone or pin attachment are handy ways to be used. Small notches can be fixed with a knife or an electric cutter even on site. A tempered glass can be added on top of the I BOARD if the design is straightly behind the gas cooker.

CARE INSTRUCTIONS

I BOARD is easy to care of. Small stains can't be seen because of the matt coating. The surface can easily be cleaned with a humid cloth. Do not use abrasive detergents or sharp objects when cleaning.
